A Virtual Taste of Chemical, Environmental & Food Process Engineering MSc Summer School

This programme will suit students with any engineering background with an interest in chemical, environmental or food process engineering.

Process Engineering

This short online course will provide students with a flavour of Nottingham and highlight process engineering concepts, vital for a successful career in chemical, environmental and food process engineering. Our unique approach ensures our graduates are highly valued by industry and is reflected in our league table position, 3rd in the UK. Our 3 sessions will show how we bring this approach to life for students on our Chemical, Environmental or Food Process Engineering MSc courses.

The 3 sessions will include mini lectures and interactive activities:

- 9am-10am An introduction to Chemical and Environmental Engineering
- 10am-11am A water treatment plant, material and energy balance in context
- 11am-12pm Modelling: the language of tomorrow

Here at the Faculty of Engineering we have world leading research in food, water, waste, sustainable chemical and microwave processing. Our aim is to give you an insight into areas that can be experienced should you decide to return to study an MSc with us.

Costs and accommodation

The course is being run online so there is no need for accommodation. All sessions can be joined from the comfort of your own home.

The course is free and there is no cost attached.

Enrol

Please register your interest by contacting us at EZ-international@nottingham.ac.uk by 20th July.

All details of how to attend the interactive talks will be sent soon after.
